## Breastfeeding: Advocacy & Practice Certificate Course

This is a BA-level infant feeding course. It is one of the advanced-level international training course on breastfeeding and related topics available worldwide.

### What does it offer?

- A chance to update your scientific, technical and practical knowledge and skills for supporting best practices in infant feeding.
- Covers all aspects of breastfeeding, from birth to two years+.
- Includes policy and programme implementation.
- A unique opportunity to study evidence - based breastfeeding with interested colleagues from around the world.
- Continually updated.
- Access to recognised experts in infant feeding.
- Emphasis on equipping professionals with skills and knowledge to use in their employment.
- Friendly and relaxed learning environment, where you can contribute and learn from each others experiences.
- Intensive course with a high level of contact time between participants and Course Directors.

### Course Aims

To develop participants' capacity for taking an active role in protecting, promoting and facilitating optimal infant feeding practices, wherever they work.

### Who should attend?

If infant feeding is an important part of your work, particularly if you coordinate national or local programmes, train others or need to have the answers to infant feeding issues – the course is intended for you.

Typically participants include paediatricians, midwifery lecturers, breastfeeding coordinators nutritionists, and public obstetricians health specialists.

Teams from the same country or facility find attending the course together particularly rewarding.

The course takes an international perspective, following the WHO/UNICEF Global Strategy on Infant and Young Child Feeding and is suitable for participants from all countries.

The course is limited to 30 participants and is conducted in English.

This is first course in India based on the syllabus of Breastfeeding Practice & Policy course, UCL, Institute of child Health, London.

### Registration procedure

To register for the course, or find out more, please see our web site on [www.bpni.org](http://www.bpni.org)

■ Applicants who need to seek funding should register **now** to receive a provisional place and a letter for approaching donors.

- If funding is already available
- complete the registration form online or overleaf
- send a brief biography outlining your work in Infant feeding

## 1<sup>st</sup> Breastfeeding: Advocacy & Practice Course 21st Nov– 4th Dec 2010

A comprehensive in-depth study programme examining the evidence for best practice recommendations and the skills required to support their realization in practice. Topics covered include anatomy and physiology of lactation, composition of breastmilk and infant formula, immunology, influences of birth practices, maternal health and nutrition, breast conditions, counseling skills, problem solving. Planning and Implementing IYCF Programmes, the Special Care Baby, infant Feeding and Emergencies, complementary feeding and International Code of Marketing of Breastmilk Substitutes and BFHI.

Participants will make visits to hospital, and newborn units and will conduct case-study work with mothers and babies. Nehru Hospital, associated with B.R.D Medical College, Gorakhpur has a very large number of newborns needing special care. This is a Baby Friendly Hospital.
