One Asia Breastfeeding Partners Forum-10

Bandar Seri Begawan, Brunei Darussalam

October 27-30, 2014

"Complementary Feeding of Infants and Young Children - Give Moms Access to Appropriate Food, No Child will Go Hungry"

A report
BPNI/IBFAN Asia follows clear ethical and funding policies that do not lead to any conflicts of interest. BPNI does not accept funds or sponsorship of any kind from the companies producing infant milk substitutes, feeding bottles, related equipment, or infant foods (cereal foods) or from those who have been ever found to violate the IMS Act or the International Code of Marketing of Breastmilk Substitutes.

We are grateful to Hon'ble Her Royal Highness Paduka Seri Pengiran Anak Puteri Hajah Masna Binti Al-Marhum Sultan Haji Omar ‘Ali Saifuddien Sa’adul Khairi Waddien of Brunei Darussalam, for gracing the inaugural ceremony of the Forum and enriching the Forum proceedings.

The One Asia Breastfeeding Partners’ Forum is a part of IBFAN Asia’s five year strategic plan. We are thankful to NORAD and Sida for supporting IBFAN Asia plan activities.

We are grateful to the Ministry of Health, Government of Brunei Darussalam for hosting this Forum, and providing support for developing the agenda for the Forum, making logistic arrangements for travel and stay of the participants and ensuring a successful conduct of the proceedings.

We are thankful to our regional representatives, Ines Fernandez from Southeast Asia and Kim Jaiok from East Asia for their contribution in the development of the Forum agenda, and coordinating participation of country representatives and other experts.

We are thankful to all the participants, speakers, chairpersons for delivering an excellent academic feast and coming out with succinct recommendations.

Dr. Arun Gupta
Regional Coordinator, IBFAN Asia
Since 2004, every year, IBFAN Asia organises an annual Forum in a different country of the region in which IBFAN country groups, Governments, UN and other agencies participate and deliberate on the issues related with infant and young child feeding. This annual event was started as a follow up to the *Asia Pacific Conference on Breastfeeding*, organised by the Breastfeeding Promotion Network of India (BPNI) and The International Baby Food Action Network (IBFAN) Asia, in Delhi in 2003. Since then, the major objective of the annual Forums has been to strengthen the breastfeeding movement and its linkages with the governments and the UN agencies and enhancing interest and action on infant and young child feeding in the region. Till, 2008, only South Asian countries were participating in the Forum. In the year 2009, participants from South-east Asia and East Asia also joined the Forum and the event was rechristened as the One Asia Breastfeeding Partners’ Forum. This report briefly highlights proceedings of One Asia Breastfeeding Partners’ Forum -10 held at Brunei Darussalam from 27th to 30th October 2014.

**Bandar Seri Begawan Declaration of the 10th One Asia Breastfeeding Partners Forum:** A drafting committee of experts participating in the Forum met several times during the Forum to draft the declaration document. The declaration was presented to the participants of the Forum in a specially designated session. Suggestions from the participants were incorporated in the document and the Forum adopted the final declaration.
The 10th One Asia Breastfeeding Partners Forum (here in after called Forum 10) was held in Brunei Darussalam from 27th-30th October 2014, and brought together over 200 participants from 21 countries and areas of Asia and Oceania region. The participants represented governments, civil society, professionals and other organizations from Afghanistan, Bangladesh, Bhutan, Brunei Darussalam, People's Republic of China, Hong Kong SAR, Chinese Taipei, India, Indonesia, Republic of Korea, Lao PDR, Nepal, Malaysia, Myanmar, Maldives, Philippines, Republic of Palau, Singapore, Sri Lanka, Thailand, and Vietnam.

The theme of the Forum was “Complementary Feeding of Infants and Young Children - Give Moms Access to Appropriate Food, No Child will Go Hungry”. Ministry of Health, Brunei Darussalam and International Baby Food Action Network (IBFAN) Asia jointly hosted it.

The Forum 10 participants, having discussed the gaps in policies and programmes on MIYCN in particular on complementary feeding;

- Recalling the global commitments enshrined in the Convention on the Rights of the Child (CRC); the Convention Against All Forms of Discrimination Against Women (CEDAW), Millennium Development Goals especially 1,4 and 5 on poverty reduction, child survival and maternal health; International Code of Marketing of Breastmilk Substitutes and subsequent relevant World Health Assembly resolutions; SAARC Model Code for the Protection of Breastfeeding and Young Child Nutrition 1996; Global Strategy for Infant and Young Child Feeding 2002; Maternity Protection Convention 2000; Innocenti Declarations of 1990 and 2005; Call for action and Declarations adopted at the One Asia Breastfeeding Partner’s Forums held in Dhaka, Kathmandu, Kabul, New Delhi, Thimphu, Colombo, Jakarta, Ulaanbaatar, Luang Prabang from 2004 to 2013; and Delhi Declaration on Infant and young child feeding adopted at the World Conference on Breastfeeding 2012;

- Recalling the 63rd World Health Assembly, which took place in May 2010, Member States adopted resolution WHA 63.14 on marketing of food and non-alcoholic beverages to children. Research has shown that food advertising to children is extensive and other forms of marketing of food to children are widespread across the world and a significant amount of this marketing is for foods with a high content of fat sugar or salt and that television advertising influences children's food preferences, purchase requests and consumption patterns. Set of recommendations on marketing of food and non-alcoholic beverages to children was endorsed by Member States to develop appropriate multi-sectoral approaches to deal with the marketing of food to children;

- Deeply concerned about the double burden of malnutrition which continues to be a serious problem in Asia and Oceania region;
Deeply concerned of the lack of food security and access to drinking water and its over commercialization that displaced community empowerment;

Deeply concerned of the marketing exploitation of malnutrition by food and beverages industries; cross branding of baby foods and food for children by companies and changing concept of healthy feeding from freshly cooked, home-based foods to pre-processed and packaged foods;

Deeply concerned of the growing profit-driven marketing of processed foods for children and mothers, causing serious problems that undermine both breastfeeding and complementary feeding practices, particularly on the promotion of breastmilk substitutes as well as commercial food products for pregnant and lactating mothers;

Recognising that most of the member countries do not have clear policy and plan of action on disasters and emergencies management in relation to MIYCN preparedness and response; where it exists, there is little attention paid to women and children, as well as Infant and Young Child Feeding (IYCF) guidelines. In this situation, the key issues are unnecessary donation of breastmilk substitutes and infant foods; distribution of processed and therapeutic foods; rampant violation of the International Code of Marketing of Breastmilk Substitutes; and lack of guideline, regulation and enforcement in this situation;

Recognising that good complementary feeding based on indigenous foods is the sustainable way forward; strongly reaffirmed that breastfeeding is life saving measure, and is the best investment for long term, holistic human health and development; gaps exist in both policy and programmes as reported in the World Breastfeeding Trends Initiative (WBTi) reports; the importance of World Breastfeeding Trends Initiative (WBTi) in benchmarking the status of policy and programmes on IYCF by the countries; and benefits of new tools like World Breastfeeding Costing Initiative in developing action plans and budgeting them;

Deeply concerned about the presence of commercial conflicts of interest at every level of development, implementation and regulation of nutrition policy and food standards; processed food are unhealthy and contain high level of salt, sugar, fat and harmful chemicals that are linked to NCDs and environmental degradation; and ready to use therapeutic foods containing high amount of fat which may have long term adverse effects and also replacing freshly cooked and home-based indigenous foods;

Recognising the evidence from many countries, severe malnutrition in children can be prevented and treated by establishing good community facilities such as crèches and providing good caring environment and cooked food to children;

Recognising that loopholes exist in the current guidelines on complementary feeding for breastfed children and often used as entry points by commercial vested interests groups to push commercial products as complementary foods; and strong evidence is required from high impact research in complementary feeding.
Agree that good complementary feeding after six months along with continued breastfeeding up to 24 months and beyond must be a political commitment, and call upon all concerned the following actions:

1. Develop clear implementation guidelines for complementary feeding for children from six months and beyond using freshly cooked, home-based indigenous foods.

2. Adopt the International Code of Marketing for Breastmilk Substitutes and relevant World Health Assembly resolutions on Infant and Young Child Nutrition by 2015 and consequently to enact legislations or strengthen existing national legislations.

3. Regulate marketing and advertising of all kinds of commercial foods for mothers and children.

4. Develop plans of action on emergency preparedness and response especially to help women and children considering they are the most vulnerable groups; supporting them with breastfeeding and appropriate as well as adequate complementary feeding including breastfeeding counselling services; and avoiding unnecessary push of infant formula and other therapeutic food products during disasters.

5. Undertake World Breastfeeding Trends initiative (WBTi) and World Breastfeeding Costing Initiative (WBCi) processes on an urgent basis to benchmark the progress and implement the Global Strategy for Infant and Young Child Feeding in its entirety.

6. All countries in Asia and Oceania should set up community-based projects or programmes to prevent malnutrition through the use of freshly cooked, home-based indigenous foods, as well as use of locally produced foods for treating malnutrition.

7. Countries facing malnutrition among women and children should take all efforts to provide appropriate food-based solutions, and stop the widespread use of commercial multiple or single micronutrient supplements.

8. Countries should establish a system of monitoring and evaluation for MIYCN implementation to track programme management and impact as well as strengthen IYCF initiatives by mainstreaming it into health care systems.

9. Policy development and regulatory mechanisms at all levels of food and nutrition policy must be free from conflict of interest.

10. Institutionalize health care worker training on breastfeeding and infant and young child feeding counselling skills at all levels in the community particularly focusing on locally grown indigenous complementary foods.

We the Forum 10 participants adopt this Declaration on 29th October 2014.
In the series of IBFAN Asia’s annual meetings, the 10th One Asia Breastfeeding Partners Forum (here in after called Forum 10) was held in Brunei Darussalam from 27th-30th October 2014, and brought together over 200 participants from 21 countries and areas of Asia and Oceania region. The theme of the Forum was “Complementary Feeding of Infants and Young Children - Give Moms Access to Appropriate Food, No Child will Go Hungry”. Ministry of Health, Brunei Darussalam and International Baby Food Action Network (IBFAN) Asia jointly hosted it.

In May, 2012 the WHO organized a workshop on MIYCN in Bandar Seri Begawan, Brunei. Three resource persons of the workshop, Alessandro Iellamo from Italy/Philippines from WHO WEPRO, Norjinah Moin from Malaysia and Ines Fernandez from Philippines/IBFAN SEA had a special meeting with Minister of Health Brunei and Ines and Norjinah requested the Minister if he can host the One Asia Forum in Brunei. The minister enquired in which year IBFAN Asia would like to host the Forum in Brunei. When requested to organise it in 2013, he suggested and agreed for 2014. By December, 2013 IBFAN drafted the 10th One Asia Forum letter of request and program necessary for approval from the Ministry of Health Brunei. The team led by Dr. Sokking and Dr Roselina at the Ministry of Health Brunei had worked diligently with series of exchanges of communications with IBFAN Asia office and IBFAN SEA.

IBFAN Asia Regional Coordinating Office and Ministry of Health, Government of Brunei Darussalam worked in close cooperation to organise the Forum. Forum preparations were discussed in the meeting of IBFAN Asia team and the Minister of Health, Brunei during the World Health Assembly in Geneva in May 2014. IBFAN Asia Coordinating Office coordinated Forum work with the local organizing committee, participants and resource persons; developed a background document for the Forum, helped in developing the Forum agenda; disseminated information about the Forum in the One Asia network and provided a financial assistance of $ 8000 to the organisers as a seed grant. Ministry of Health, Government of Brunei made arrangements for the Forum venue, audio-visuals and food for the participants; assisted participants for accommodation, local travel etc.; provided formal invitation to the participants; helped participants to get entry VISA and provided information for travel to Brunei; provided inputs in the development of the agenda, organised an exhibition on child health and nutrition during the Forum at the venue and organised a cultural night and dinner for the participants.
The Forum was inaugurated by Her Royal Highness Paduka Seri Pengiran Anak Puteri Hajah Masna binti Al-Marhum Sultan Haji Omar ‘Ali Saifuddien Sa’adul Khairi Waddien of Brunei Darussalam at the Al-‘Afiah Hall of the Ministry of Health. The Minister of Health, Pehin Orang Kaya Johan Pahlawan Dato Seri Setia Awang Haji Adanan bin Begawan Pehin Siraja Khatib Dato Seri Setia Awang Haji Mohd Yusof as well as the permanent secretary and deputy permanent secretaries at the ministry also graced the inauguration ceremony. Her Royal Highness presented a sabda and officiated the launch of two books, namely, ‘Brunei Darussalam: Journey Towards Comprehensive Maternal, Infant and Young Child Nutrition’ depicting the history of health services for mothers and infants in the Sultanate since 1939 as well as its recent developments; and ‘National Strategy of Maternal, Infant and Young Child Nutrition in Brunei Darussalam 2014-2020’ depicting the framework and national strategy for this target group and describes the journey and achievements of the Health Care Foundation since its inception. Keynote address was delivered by Dato (Dr) Anwar Fazal, co-founder of IBFAN as well as World Alliance for
Breastfeeding Action (WABA). He spoke about ‘Feeding the Future – Challenges and Opportunities’. He described breastfeeding as a wonderful gift of nature highlighting the ‘Panchshila’ of breastfeeding like a beautiful flower with five petals – breastfeeding is an essential medicine, good nutrition, ecologically friendly, economically good and representing the wonderful bond of love of mother and child. He made three suggestions - that everyone should support wonderful IBFAN project – WBT; Brunei should consider organizing a World Conference on Child Care in Islam; and IBFAN, WABA, WHO, UNICEF and Brunei together should institute an annual global award – ‘World Breastfeeding Prize’.
Various sessions based on the theme of the Forum were organised. All the sessions were very informative and interactive. A brief description of sessions during the Forum is given below:

Day one

**Global Recommendations on Complementary Feeding – Need for a Relook:** This presentation was made by Dr. KP Kushwaha, Principal and Head of Paediatrics Department, BRD Medical College, Gorakhpur, India. He deliberated upon WHO Guiding Principles for Complementary Feeding of the Breastfed Child (2001), Guidelines for Infant and Young Child Feeding in Emergencies (2007) and HIV and Infant feeding Guidelines by WHO (2010). He further emphasised that with ever-emerging scientific evidence, there is a need to revisit the WHO guidelines for complementary feeding. He recommended that there should be political will and defined government policies to protect, promote, and support complementary feeding; uniform definitions of various terms used for complementary feeding and in the guidelines thereof should be made; recommendations on macronutrient and micronutrient should be consistent and updated, and home cooked complementary foods should be promoted and protected.

The 'Hottest' Products in Baby Food Marketing Today: Annelies Allain, Director, International Code Documentation Centre (ICDC) and Co-founder of IBFAN, discussed exploding world markets, especially in Asia, with toddler milks or growing-up milks. She further stated that these products were invented by the industry to use loopholes in the International Code of Marketing to freely promote them as advertising for toddler milk functions as indirect promotion for infant formula. By cross-branding and brand-extension, such promotion undermines breastfeeding and appropriate complementary feeding. She highlighted such activities from Asian...
countries and suggested reporting of cross-branding activities.

**Growing-up Milk Perceptions:** Professor Dr. Hajjah Adlina Suleiman, Medical Professor, National Defence University of Malaysia discussed findings of the study on Growing-Up Milk. Objective of the study was to determine if marketing of growing up milk in mass media influences a mother’s choice of feeding.

Main component of the study shared by Professor Dr. Adlina was to show the mother the paper advertisement of the formula product for five seconds and subsequently record her observation about the brand name and various numbering depicted on the labels of growing up milks like 1 or 2 or 3 etc. It was also recorded if she has noticed the statement about mother’s milk on the label. When shown the picture of the milk formula 90.6% saw the brand but only 75.5% got the brand right, 50.1% saw the number 1, 52.8% saw the number 2, 58.5% saw the number 3 and 4, 62.3% saw the Mama’s Milk word. 41.5 % mothers stated they see no obvious difference between the packaging of infant formula and the growing up milk. Only 50.9% mothers said that they can differentiate the advertisement for infant formula and growing up milk. She emphasised that there may be cross reference to the branded mothers milk (they may buy infant formula from the brand that they used while pregnant) and continue for growing up milk.

**Food in Emergencies:** In this multi-country experince sharing session, Dr. Romelei Camiling-Alfonso, Philippines; Dr. Renuka Jayatissa, Sri Lanka; Dr. Chwang Leh Chi, Chinese Taipei and Mia Sutanto, Indonesia discussed importance of appropriate infant and young child feeding in saving lives of children during emergencies and disasters. The session dealt with the topic by sharing experiences during a real-life situation in Philippines, Sri Lanka, Chinese Taipei and Indonesia. The common challenges faced by each country highlighted by experts were managing donation from companies which often try to make emergency situations into business especially among infant formula milk companies; and sub-optimal implementation of the existing International and national guidelines for infant and young child feeding during emergencies at country level. During emergency, there are often no interventions offered to pregnant and lactating mothers due to lack of training programmes as well as guidelines in disaster preparedness for nutrition emergency at country level.
Day Two
Day Two of the Forum was devoted to Food Security and Safety. Following presentations were made by experts in this session:

Using Home-made, Local Food to Treat Acute Malnutrition: Dr. S K Roy from Bangladesh and Dr. Vandana Prasad from India shared their respective research experience of effectively managing and preventing acute malnutrition at community level in developing countries like Bangladesh and India by using homemade, local foods. Dr. Roy gave general information about the child malnutrition in global as well as Bangladesh context. He stated that the ideal rehabilitation for an acutely malnourished children should be to gain body weight with muscle and bone through a longer time with near normal body composition, which may be achieved with home made high energy foods made with local ingredients. He shared his research studies showing effective management of acute malnutrition using home made foods like Khichuri. Dr. Vandana Prasad shared her experience of managing acute malnutrition in India using a multi strategic intervention titled ‘Action Against Malnutrition’ (AAM). Various interventions used are – System strengthening, Participatory Learning Activity (PLA) and provision of Creches. Crèches catered children from 6 months to 3 years providing space for working mothers who can go to work freely and then can come and breastfeed their children at regular intervals. Complementary feeding of children was also taken care of in the Creches where meals were provided 3 times a day and for children who were undernourished 5 times a day with increase in the amount of cooking oil. With these interventions, the study reported a significant decrease in the incidence of wasting in children. Both the speakers highlighted vital role of optimal infant and young child feeding practices in preventing acute malnutrition.

Food in Preventing Diseases and Improving Health: In this session, Ma. Ines Av. Fernandez from Philippines talked about Food that Heals, Food that Makes you ill. While Siti Norjinah Moin from Malaysia spoke about Food and Spirituality. Both the speakers emphasised about immense properties of traditional foods for preventing diseases and providing healing. With the advent of time, societies have forgotten beneficial properties of these food items. Hence the use of hazardous, high sugar, high fats, and high salt foods is increasing.

Dangers of Processed Foods Marketed for Children and Moms: Kim Jaiok, South Korea, presented perils of processed foods being marketed for children and mothers. She highlighted the role of processed foods
in causing obesity, hypertension and other body ailments in children as well as adults. She also shared the global regulations and guidelines for marketing and use of these products.

**Protecting Food Safety and Food Security through Codex Alimentarius:** Dr. JP Dadhich from India discussed how food standards and safety are a vital issues affecting infants and young children’s health, growth and development. He highlighted how Codex Alimentarius process provides global standards for composition, labelling, hygienic preparation and storage etc. of foods items. He gave information about the process of developing standards and some relevant standards of foods for infants and young children. He mentioned lack of participation of government delegations from developing countries in this important global process. He also shared information about how industry is using the Codex process for its benefit to facilitate the trade. Industry is participating in vital decision-making process to formulate the food standards at global and national, which is a clear case of Conflict of Interest. He stated that the International Association of Infant Food Manufacturers represents industry in the International Codex meetings as an observer. But more problematic is industry representative participating in the meetings as a member of official country delegations. He gave an example of Codex Committee on Nutrition and Food for Special Dietary Uses (CCNFSDU) meeting in 2013, in which country delegation of China had representatives of formula companies like Dumex, Nutricia, Nestle, Mead-Johnson, and Abbott. Formula industry also sponsors national delegations to participate in the Codex Committee meetings. At national level, industry participates in the national codex committee meetings as a member and influence vital decisions on national positions on proposals being discussed in various Codex Committees. He gave an example of India, where industry is a member of many national committees on Codex.

He suggested that more governments from developing countries and IBFAN/other public interest NGOs should participate more actively in the Codex process both at national as well as international level. He further emphasized that prevailing Conflict of Interest in the international/national codex process needs to be addressed.

**Water Water Everywhere—But where are the Drops to Drink?** Faizah Jamal, parliamentarian & environmental lawyer from Singapore discussed environmental degradation being a major challenge in front of the world community today and in the quest
for ‘development’, deforestation is happening. At the same time, limited resources like water are being used without prudence.

**Complementary Feeding - Innovative Food Resources and Community Participation:** In this interactive session, three speakers from each sub-region of Asia, namely, East Asia, South Asia and South-East Asia shared some innovative ideas about diverse foods from different communities in their respective countries. Dr. Homayoun Ludin from Afghanistan shared information about the newly developed ‘improved feeding practices and recipes’ book by the government of Afghanistan. He shared various recipes of locally prepared complementary foods like potato and bean mash, milky rice, rice soup etc. He also discussed nutrient contents of such recipes. He informed about the training being imparted to government staff about preparation of foods based on these recipes so that they may transfer this skill to the community. Ms. Meena Gurung from Bhutan shared some recipes for complementary foods prepared with locally available food ingredients like rice porridge and red rice pudding. Dr. Khamseng Philavong from Lao PDR shared prevailing situation of undernutrition in her country. Further she shared recipes of common complementary foods used in LAO PDR like rice and egg mix, rice with groundnut mix and their nutritional composition. Dr. Quan L Nga made a presentation on innovative food, resources and community participation for complementary feeding of infants and children in Vietnam. She informed that diverse foods are being used as complementary foods in Vietnam. She shared some recipes of common complementary foods like vegetable soup made of tomato, carrot, peas, potato, oil and salt. Dr. Yupayong Hangchaovanich from Thailand stated that Thailand has developed food based dietary guidelines for children’s complementary foods which also contains recipes for nutritious complementary foods prepared with locally available ingredients like gruel made of mashed potato, boiled egg yolk, pumpkin and breastmilk; and gruel made of mashed rice, chicken, carrot and breastmilk. Dr. Chwang Leh-Chii from Chinese Taipei shared recipes from her country like small fish congee made of rice, green soybean, clear broth and small fish; chicken rice with egg Fu-Yung made of egg, chicken sweet corn and rice; rice noodle with tomato and pork; pork tofu with sweet potato and rice etc. Mrs. Shuyi Zhang from China shared some recipes of common complementary foods, their nutritional values along with the method to prepare them. Some of the recipes were Noodle with egg, tomato, and minced meat and Porridge with chicken liver mud. Overall, this session reflected diversified food culture in Asian countries and common use of local ingredients to prepare the complementary foods.

**Workshop on MIYCN guidelines:** This session dealt with many important issues related to Maternal, Infant and Young Child Nutrition (MIYCN). Dr. Ong Sok King from Brunei Darussalam shared development of the national strategy for MIYCN in Brunei Darussalam for the period 2014-2020. She shared MIYCN related statistics in Brunei Darussalam, evolution of MIYCN related services & policies, process of developing the national strategy in and the plan for its implementation.

Madam Lavan Southisan spoke on the gender equality and gender machinery in Lao PDR. She stated that education among women is still lower than the men though the Gender Parity Index (GPI) in Lao PDR has improved in all three levels of education. She informed that women are now present in political and other higher policy making positions. She mentioned how institutional mechanisms like Lao Womens’ Union and National Commission for the Advancement of Women are working for the empowerment of women.

Blecenda Varona, PhD Nutrition from Philippines, discussed food therapy implementation in sick moms with NCDs and malnutrition and highlighted role of plant based foods in preventing coronary artery disease. Dr. Patricia Ip from Hong Kong SAR highlighted Hong Kong experience of measures for prevention of maternal and child malnutrition. She informed that in her country, childhood obesity is a real problem and directly related with high protein and sodium intake, low intake of fibers, very common use of infant formula particularly in children beyond...
one year of age, inadequate intake of vegetables and fruits. In mothers, undernutrition is uncommon but there is increasing use of commercially available milks for mothers. She mentioned that to address the prevailing situation, Code implementation has been strengthened and a committee on promotion of breastfeeding has been established. Among various challenges, private hospitals are still not certified for BFHI, and maternity leave is for 10 weeks only.

Day 3
Day Three of the Forum was devoted to discuss progress in WBTi assessment process and development of Bandar Seri Begawan Declaration of the 10th One Asia Breastfeeding Partners Forum.

World Breastfeeding Trends Initiative Country Assessment: This session included presentation about the progress in WBTi assessment from some newly trained countries including Brunei Darussalam, Myanmar, Palau and Singapore. All four countries made significant progress in identifying the process to accomplish the assessment in their respective countries. Followed by this, there was a presentation about the new revised WBTi tool by Dr. JP Dadhich. He shared information about the need and process of revision and salient contents of the revised tool. Subsequent to this, participating countries in the Forum shared its country plan of activities for 2015-16, with a focus on WBTi assessment. Brunei Darussalam presented a draft assessment of all the indicators; Myanmar representative informed that intra-department discussions are going on in the Ministry of Health to undertake the assessment process; representative from Palau shared the progress in WBTi assessment with development of a draft report based on the revised tool with a plan to finalise it and develop a plan of action using WBC tool in January 2015. Singapore team stated that the process for the assessment will start in November 2014 with formation of a core group and subsequently developing a report.
# AGENDA

**Day 1: Monday, 27th October 2014**

## Morning Opening Ceremony

**3:30 4:00 P.M. TEA BREAK**

**Chairpersons:**
Hajah Salmah binti Haji Mohd. Noor, Lecturer, Pengiran Anak Puteri Rashidah Sa’adatul Bolkiah Institute of Health Sciences, Universiti Brunei Darussalam
Ma. Ines Av. Fernandez, IBFAN SEA Representative, Mass Communication Specialist, Philippines

**Food in Emergencies**

1. Dr. Romelei Camiling-Alfonso, Family Medicine Trainer for Essential Intrapartum and Newborn Care, Maternal and Child Health Integrated Program of Mag-Ina Kalusugan, Manila, Philippines
2. Dr. Renuka Jayatissa, Consultant Medical Nutritionist, Ministry of Health, Colombo, Sri Lanka
3. Dr. Chwang Leh Chi, Nutrition Professor, Taipei Municipal Gan-Dau Hospital, Chinese Taipei
4. Mia Sutanto, Founder and Chairwoman of Indonesian Breastfeeding Mothers’ Association, Indonesia
### Day 2: Tuesday, 28th October 2014

**Theme: Food Security and Safety**

#### 9:00-10:00 A.M

**Chairpersons:**

Dr. Hajah Rohayati binti Haji Md. Taib, **Consultant and Head of Paediatrics Specialty, Department of Medical Services, Ministry of Health, Brunei Darussalam**

Hajah Jainah binti Haji Musa, **Lecturer, Pengiran Anok Puteri Rashidah Sa’adatul Bolkiah Institute of Health Sciences, Universiti Brunei Darussalam**

**Using Home-made, Local Food to Treat Acute Malnutrition**

Dr. S K Roy, **Nutrition Scientist, and President of Bangladesh Nutrition Foundation, Bangladesh**

and Dr. Vandana Prasad, **Public Health Resource Network, India**

**Food in Preventing Diseases and Improving Health**

**Food that Heals, Food that Makes you ill**- Ma. Ines Av. Fernandez, **IBFAN SEA Representative, Mass Communication Specialist, Philippines**

**Food and Spirituality**- Siti Norjinah Moin, **President Breastfeeding Information Bureau, Malaysia**

#### 10:00-11:00 A.M

**Chairpersons:**

Hajah Saloma binti Haji Ongsang, **Lecturer, Pengiran Anok Puteri Rashidah Sa’adatul Bolkiah Institute of Health Sciences, Universiti Brunei Darussalam**

Hajah Roseyati binti Dato Paduka Haji Yaakub, **Senior Community Nutritionist and Head of Community Dietician Division, Department of Health Services, Ministry of Health, Brunei Darussalam**

**Dangers of Processed Foods Marketed for Children and Moms:** Kim Jaiok, **Consumers Korea President (Int.), South Korea, IBFAN Eas Asia Representative**

**Protecting Food Safety and Food Security through Codex Alimentarius:** Dr. JP Dadhich, **Senior Paediatrician, India and National Coordinator, Breastfeeding Promotion Network of India (BPNI), India**

#### 11:00-11:30 A.M. TEA BREAK

#### 11:30 A.M. - 1:00 P.M.

**Chairpersons:**

Dr. Nik Ani Afiqah Tuah, **Lecturer, Pengiran Anok Puteri Rashidah Sa’adatul Bolkiah Institute of Health Sciences, Universiti Brunei Darussalam**

Professor Dr. Adlina Suleiman, **Medical Professor, National Defence University of Malaysia, Malaysia**

**Water Water Everywhere—But Where are the Drops to Drink?** Faizah Jamal, **Environment Consultant and Environment Educator, Conscious Connection International, Singapore**

**Complementary Feeding: Innovative Food Resources and Community Participation**

1. South Asia: Dr. Homayoun Ludin, **National Infant and Young Child Feeding Consultant, Afghanistan**; Dr. SK Roy, **Nutrition Scientist, President of Bangladesh Breastfeeding Foundation**; Ms. Meena Kumari Gurung, **Bhutan**

2.
